CARE INSTRUCTIONS FOR YOUR NEWLY PLANTED TREE

WATER TREES FOR 3 - 5 YEARS UNTIL ESTABLISHED

	Winter	(December – February)	7.5 Gallons/Week
Provide Slow,	Spring	(March – May)	10 Gallons/Week
Deep Watering	Summer	(June – September)	30 Gallons/Week
	Fall	(October – November)	20 Gallons/Week

Soil Types

Clay – Holds more water, dries slowly. Water less frequently.

Sandy – Holds less water, dries quickly. Water more frequently.

Note: More water may be needed during long periods of severe heat and drying winds, conversely, less water may be needed during extended periods of cool, rainy weather.

KEEP TREES BASE AREA FREE OF GRASS AND WEEDS

Keep an 18-inch circumference around the trunk base free of sod and cover with a 3-inch layer of mulch while not burying the trunk itself. Pull unwanted vegetation by hand to prevent damage to the trees feeder roots and prevent weed trimmer damage.

- DO NOT FERTILIZE OR USE WEED KILLERS (FERTILIZER APPLIED AT PLANTING)
- PERIODICALLY (6 MONTHS) CHECK TREE TIES TO ENSURE THEY DO NOT CONSTRICT TRUNK
 LOOSEN IF NECESSARY
- PROTECT FROM VANDALISM
- REMOVE TREE TIES AND TREE STAKE AFTER 1 3 YEARS

TREE SPACING GUIDELINES

Tree locations exist among other right-of-way infrastructure. The placement of street trees in relationship to each other and other infrastructure is important for the health and vitality of the tree as well as the additional infrastructure.

Ine recommended desirable distances between street trees are species specific and range from twenty-five to forty feet. Please refer to the **Street Tree Selection Guide** on our website library at http://bss.lacity.org/UrbanForestry/index.htm. The recommended desirable distance between street trees for subdivision projects (for estimating purposes) is thirty feet. The information below is only a reference guide. To obtain approved planting locations, please contact the Urban Forestry Division at (213) 847-3077.

Street tree distances from other infrastructure are as	Feet
